| <b>Notes</b> | Where not supplied use original fittings | <b>dB Killer</b> | SCEXDBK23 - (Type V) |

A) Start by removing the bolt from the vband clamp on the rear silencer.

B) Open the clamp up and slide it off of the flanges.

C) Support the weight of the rear silencer and remove the mounting bolt.

D) Carefully remove the silencer from the bike.

E+F) It's now time to install your new Scorpion Exhaust starting with the connecting pipe. Place it onto the original system and attach using the original vband clamp. Leave the clamp slightly loose at this point to allow adjustment.

G) Slide the Scorpion silencer onto the connecting pipe and align the mounting bracket with the original mounting point on the bike.

H) Insert the supplied mounting hardware into the mounting bracket in the order shown in the diagram on the 1st page.

| <b>Notes</b> | Where not supplied use original fittings | <b>dB Killer</b> | SCEXDBK23 - (Type V) |

I) Attach the springs between the silencer and the connecting pipe.

J) Adjust the system so that it sits nicely, is clear of moving parts and is under no stress, then fully tighten the vband clamp.

K) Now fully tighten the silencer mounting bolt.

L) Take the bike for a short ride to ensure it functions as it should. Once the bike and exhaust are cool enough check all nuts and bolts are still secure.
